

To achieve more with less – **ask the professional**

iDOC is based on a comprehensive consultation concept which, step by step, takes all aspects of your business output requirements into consideration: current analysis and strategic proposals resulting in a solution to fit the needs of your business.

Our Concept: All Output Services from One Source!

Hardware

- Printers and All-in-One colour and b/w laser Systems
- Office Products like b/w & colour Copiers and Multifunctionals with included Print, Fax and Scan options
- Production Printing systems up to 105ppm with excellent online finishing-, software- and print on demand features

The iDOC advantage

We offer individual solutions which are tailor-made for your business needs:

- Flexible contracts with fair conditions, plus effective accounting and on demand reporting
- Transparent system control results in less administration and specific cost allocation
- Flexible service level agreements with fast reaction times
- high security standards for sensitive documents with encryption and password protection
- Single point of contact assure that you always have a direct contact partner
- All procedures are continuously adapted to your needs

Target of the iDOC concept is to optimize and streamline the output infrastructure and processes while increasing productivity with end-to-end solutions. By detecting hidden expenses that were previously not found and therefore not allocated – iDOC generates more awareness and reduces overall output related costs.
